Valued Customer,

As of January 1, 2019, Harvey Drilling Inc., will be offering a maintenance plan for your well, we feel this will assist our customers in the best possible way.

A Harvey Drilling tech would inspect your well twice a year. The inspection would include wrapping your pipes before the cold weather comes and taking preventative actions for when the warm weather rolls around. This plan will have the added bonus of lower repair cost during the year and ensuring that your well is running properly and efficiently. These are a few advantages that the maintenance plan could provide for you.

For more information on this plan and how to take full advantage of this service contact **Harvey Drilling at 229-435-0204.**
